TOPIC DISCUSSED WAS ELEVATORS

MOST OF SESSION AT OTTAWA YESTERDAY TAKEN UP WITH THIS QUESTION.

Ottawa, Feb. 13.—The Commons spent practically the whole of today's sitting discussing a resolution moved by Dr. Schaffner, Conservative, Ontario, relating upon the Government to go in for Government ownership and control of terminal elevators at Port Arthur and Port William as well as transfer elevators between those lake ports and the Atlantic seaboard. It was the second time this session this question had been the subject of a full debate as Mr. Martin, Regina, some time ago, invited a discussion on a motion calling upon the Government to take steps to prevent admixture of grain in terminal elevators. Mr. Schaffner shortly after the House met, moved that in the opinion of this House, the present system of operating terminals and transfer elevators is detrimental to the interests of the Western grain producers and that the Government should take immediate steps to operate the terminal elevators at Port Arthur and Port William and transfer elevators between those terminals and the Atlantic seaboard.

Dr. Schaffner first reviewed the history of the elevator question in the West with the object of showing that if the farmers of this province are not at the present time united on the question of Government ownership of the line or interior elevators, they are agreed as to the necessity of the Government taking over the control of the terminal and transfer elevators. In the past most stock had been taken in farmers movements because of their lack of stability, but these days are over. This was illustrated by a delegation of 800 Western farmers who came to Ottawa in December and met with a conference of J. H. Hill, editor, and made the compromise chamber grain elevator. Some people were inclined to say that the farmers asked for too much. Have the railways and other corporations often asked too much at Ottawa? One thing was true. The Western farmers had asked too much, they would all be ready to do it and accept what is best for the country.

Elevators at Lakes.
Dr. Schaffner then proceeded to deal in detail with the operations at the terminal elevators at Port Arthur and Port William. He said there was absolutely no doubt that the stealing of wheat had been going on at the terminal elevators for years. The farmers were convinced as to this. There was also mixing and manipulation. It would surprise most people to learn that the Government maintains a staff of ninety-five men at Port Arthur and Port William to watch this stealing of grain going on. The elevators likewise keep their staffs and the whole comes out of the wheat. He entered into the details of lines imposed on the terminal elevators and said that it was important to note that the C.P.R. is a simple carrier of grain with no interest in mixing it. He believed that no bill could be introduced in Parliament and no regulation devised which would prevent the admixture of grain as long as the Western house men are permitted to have an interest in the grain they handle.

The Senate Bill.
Dr. Schaffner then made a reference to the bill introduced in the Senate by Mr. Richard Cartwright, something it as but a continuation of a further application of the system which has been in force for years and under which frauds had occurred and farmers had lost wheat probably to the value of ten million dollars. He thought that the cure of the whole matter lay in Government operation more than in Government ownership as it was not particularly who owns the elevator. After citing figures to show that the great bulk of wheat passing through the terminal elevators and that the question is therefore a very important one. Dr. Schaffner repeated his belief that nothing short of Government operation would solve the problem and that the Government's bill since not go on.

Dr. Noakes's Reply.
The Hon. Mr. Noakes, in reply, said that in view of the introduction of a bill in the Senate dealing with the matter, he had no objection to the Government's bill since not go on.

ement took that the people were constantly robbed in the elevators at Port Arthur and Port William. It was not Canadians who controlled all these terminal elevators, except C.P.R. elevators. The Government has allowed these foreigners, these Americans, to rob the farmers through a long course of years. He hoped that Government ownership of elevators would give relief to Western Canada.

Dr. Clark's Speech.
Dr. Clark (Red Deer), said the opposition speakers were willing to oblige the grain growers of the West. He hoped that they would also support the reciprocity proposals on the same grounds. The measure presented was one of such unimpeachable quality. He was surprised that a Conservative party would advocate such a government and he viewed with the greatest apprehension these proposals. If the charges were true that there was actual thieving at the elevators, this could be put down by the criminal code.

Gov. McCreary, Saskatchewan, said he was afraid that the time when the House was being wasted in considering any bill that did not have for its object either Government ownership and operation of all terminal and transfer elevators. He could quote that some other satisfactory solution of the question might be found but there stands in the way this very important fact that it is impossible to identify quantities of the grain from variety of the argument should be taken out of the hands of those interested. The existence of an amendment had demonstrated these difficulties.

Mr. McCreary believed that the expressed wishes of the farmers should be carried out and that in the case of Government ownership of the ship should prevail. If the clause in the proposed bill providing for taking over of the elevators by purchase lease, or expropriation was as good as it was claimed, it would be a good thing. Mr. McCreary said, in postscript, further discussion of the question for the present.

Hon. Mr. Oliver C. Gault.
Hon. Frank Oliver thought the Government would not be justified in taking the full responsibility for terminal and transfer elevators. It behooves any sane Government to move cautiously and this Government could not undertake this huge responsibility without a thorough inquiry into the matter. The Government would be unwisely to rush into such haste. The bill in the Senate provided for a commission of control which would have full control

of the elevators from the Atlantic to the Pacific. This commission would have power when funds are available, to acquire and operate elevators. The Government was not concerned, however, of the importance of the question.

Dr. Roche, Marquette, argued that as the Government already owned the elevators at Port Arthur and Port William and St. John, there was no reason why the Government should not also own the elevators at Port Arthur and Port William.

At test times, Dr. Noakes's amendment was adopted on a vote of 86 to 81.

Hon. L. P. Brodeur introduced a bill to compel all passenger vessels to be equipped with life boats.

Before the House rose, the third reading was given to the Verrell bill providing for an eight hour day for workmen on Government buildings.

SENATE NOW CLAIMS ESTATE.
Holds That It Will Be Valid, He Is, as Next of Kin.

Concord, N. H., Feb. 13.—Another complication in the contest over the disposal of the \$250,000 residue of the estate of Mrs. Mary Baker Eddy, former leader of the Christian Science movement, was introduced today by Mr. Eddy's son, John, who claimed that he was the next of kin.

Mr. Eddy's son, John, who claimed that he was the next of kin, was introduced today by Mr. Eddy's son, John, who claimed that he was the next of kin.

PRAIRIE PROVINCES PAY HIGHEST WAGES

For Farm Help, Both Male and Female. Canadian Laborers in Canada During 1910 Made Record Average According to Statistics Secured by Department at Ottawa.

Ottawa, Feb. 13.—The Census Bureau for January says that wages and wages in Canada made a good record for 1910. The total value of work done on the farms in 1910 was \$1,975,748,000, which is \$1,975,748,000 more than in 1909. The price per bushel of wheat was \$12.50 as against \$10.72 in 1909, of which cows \$12.50 against \$10.50, of other cattle \$10.50 against \$10.50, and of sheep \$10.50 against \$10.50. The total value of horses in 1910 was \$1,975,748,000, which is \$1,975,748,000 more than in 1909. The value of swine, however, fell from \$1,975,748,000 in 1909 to \$1,975,748,000 in 1910.

The highest average price of horses was in Saskatchewan, of which cows \$12.50 against \$10.50, of other cattle \$10.50 against \$10.50, and of sheep \$10.50 against \$10.50.

The average value of occupied farm land in the Dominion was \$18.46 per acre, or 15 cents less than for the previous year. It was highest in British Columbia, where the cost of clearing is heavy and the land is largely occupied for fruit growing. The average being \$74.14 per acre, or 15 cents per acre more than in the previous year. Ontario comes next with \$48 per acre, which is \$2.12 less than in 1909.

Farm help for the summer season should be about \$1.50 per month for males and \$2.00 for females, counting board, as compared with \$1.50 per month in 1909. Males have an average of \$1.50 per month, and females \$2.00 per month. The highest price per month in summer are paid in Saskatchewan, Alberta and British Columbia, where they are \$4.00 and over for males and \$2.00 and over for females, counting board. The average rate of board per month ranges from \$4.00 for males and \$2.00 for females, counting board, to \$2.00 and \$1.50 respectively per month in British Columbia.

The rates of wages and board are quoted for the farm, where males are employed in the land and females in the house. They are averages computed from the returns of 100 or more farmers to the census office.

U.S. TO COPY LABOR LAWS OF DOMINION

The State of Minnesota Publishes The Model of Canadian Legislation Dealing With Strikes and Disorders Between Employers and Employees.

Minneapolis, Feb. 13.—The Canadian system of compulsory investigation of labor troubles will be proposed for Minnesota in a bill to be introduced in the House tomorrow by Representative Knute Nelson, of Swift Falls.

It prohibits employers from striking or employers from locking out their men until the questions of difference have been submitted to a "Board of Conciliation and Investigation." The finding of this board do not have to be accepted, but the inquiry must be made and a recommendation published by the board before the strike or lock-out can occur.

The bill is almost a copy of the Canadian law, but with some changes necessary to conform with the Minnesota law and procedure which have been suggested by the attorney general's department.

HOLDUP MAN HELD UP.
Robbed of Proceeds of His Daring After Getting \$3,000.

Chicago, Feb. 13.—Even a thief is not safe in Chicago is the complaint which Charles Willard made to the police today when he confessed that he had been held up by a holdup man Sunday morning and secured \$1,200.

Willard's life in his homecoming was short-lived, he said, for as he was leaving the cafe door he was met by three men, who, with a revolver pressed against his side, escorted him to an alley and robbed him of the proceeds of the holdup.

Willard, according to his confession, was one of the three confederates who obtained and made the holdup. He is in the hospital as a victim of a conspiracy devised by a friend to whom he confided the plan for robbing the safe.

The story, incredible as it first seemed to the police, was corroborated and \$500 recovered. William Lottus, a saloonkeeper, has been arrested and charged with having been an accessory to the robbery and with having received stolen property.

The original robbery occurred in the Restaurant Ruby morning, when a lone bandit entered as John Adams, the cashier, and Ray Sayre, assistant head waiter, were near the cashier's desk.

To solve the pair he proceeded to pour \$2,500 from the cashier's drawer into a bag. The police searched vainly for the lone desperado for many hours, when a man from an unidentified woman saved them a clue.

GAS FROM OPEN STOVE HAS A FATAL EFFECT

An Aged Woman Living in the Home and Two Sons Injured as the Result of Asphyxiation.

Wauwatosa, Wis., Feb. 13.—As a result of escaping gas from an open stove after the dinner had been closed, Mrs. Lister, aged 44, was found dead in her bedroom and her two sons, aged 16 and 14, were rendered unconscious.

Thomas is supposed to have left the stove open, forgetting to open the window. The Lister family is a well-to-do family of this point and the condition of the occupants of the house was ascertained when a neighbor, Geo. Pringle, of Wauwatosa, called on the family.

Getting no reply to rap on the door, he looked through the window, but saw no signs of life. He then burst in the door and found Mrs. Lister lying near the door dead, while her two sons were in bed unconscious. The men are on a fair way to recovery.

Mrs. Lister came from Fairdale, Ontario, a year ago, with her sons have been in this district for two years.

NEW GRAND TRUNK DIRECTOR.
Sir Felix Schuster Has Been Appointed as a Member of the Board.

Montreal, Feb. 13.—The general offices at Montreal have been notified of the appointment of Sir Felix Schuster as director of the Grand Trunk Railway Company of Canada.

Sir Felix Schuster, a well-known officer is chairman of the board of the Union Bank of London and Smith's Bank, London, England, and during last summer made a tour of Canada at which time he was greatly impressed with the country.

ROYALTY HAS MEASURES.
Prince of Wales and His Brother Are In Naval Training College.

London, Feb. 13.—It was officially announced today that the Prince of Wales and his brother, Prince Albert, are suffering with German measles at the naval training college at Dartmouth. Up to the present time it has been insisted that the two young princes were suffering simply from cold and the latest admission is regarded as ominous, because of the fact that the measles are epidemic at Dartmouth and two deaths have already occurred.

Schooner Lost in Storm.
Boston, Feb. 13.—Unreported for two weeks, the Gloucester fishing schooner "Whitcomb," which left the Bay of Islands, Boston, three weeks ago today, is believed to have been lost and her crew of nine men drowned during last week's storm.

Winter Comfort

Alberta the theme of much discussion

E. W. Crandall of the C. P. R. gives an interview to the Bulletin regarding the proposed railway route through Alberta.

Alberta is in the public eye, and one only has to mention the name to bring this fact to the surface. I found after reaching the western seaboard that all that was required to get an audience was to simply announce that I was from the great Canadian Northwest, known as Alberta, and presto! I had a crowd of willing listeners at once. I have long had in my mind the idea of writing a book on the most favorable places for investment, but although daily in the work of the company and meeting people, I never was so impressed with the general feeling toward investment in the Northwest as I was during my recent trip. Notwithstanding all that has been said and written about the Northwest, it is only a matter of time before the Northwest will be one of the most favorable places for investment, but although daily in the work of the company and meeting people, I never was so impressed with the general feeling toward investment in the Northwest as I was during my recent trip.

Winter Year for Settlements
In speaking of the prospects of the present year, as indicated by various interviews with people met along the way, Mr. Crandall expressed the opinion that this will be a banner year for settlement in the Northwest, and that the Northwest will be one of the most favorable places for investment, but although daily in the work of the company and meeting people, I never was so impressed with the general feeling toward investment in the Northwest as I was during my recent trip.

Reflections About Our Big White Sale

All women take as much pride and pleasure in their store of fine snowy Lingerie as they do in their array of ball gowns or street dresses. Many women have learned that lingerie perfection does not necessarily imply high-priced garments, and this store has done more than any other in Edmonton to make this clear. Even our lowest priced lines are made of nainsook of a beautiful smooth even quality, differing from that used in our highest priced garments only in being of not quite so fine a texture. If you have decided to purchase some Whitewear, we advise and invite comparison—for in that case it will look quite unreasonable for you to buy elsewhere.

WOMEN'S DRAWERS, made of nice quality cotton, hem-stitched and trimmed with lace, open or closed, all sizes. Per pair.....**25c**

CHILDREN'S WHITE DRESSES

We have a full line of White Dresses for Children, all the newest styles and in every quality and price. We can fit them all from the baby to the Miss of 16 years. See Our Display of Children's Dresses.

MUSLIN WAISTS

We have them—And a larger assortment of them than was ever shown in Edmonton before, made in all kinds and qualities of materials, and all in the very latest styles. See the display on the tables. Prices ranging from.....**75c to \$1.00**

CORSETS

The first essential to a perfect figure and the stylish draping of your new gown is "correct corsetting." The corset is put on in advance of the dress, so that the figure may be made for the fashion. Our new corsets are all in. We handle the famous "W.B." and "D.A." makes. Their designs are the latest and always "up to the minute." We cordially invite you to visit this section.

WOMEN'S DRESSES

To add special interest to our White Sale we have received and placed in our show room an advance shipment from New York of **WOMEN'S GINGHAM AND MUSLIN HOUSE DRESSES**. They are all pretty and make a collection which offers a great variety to the first buyers. Sizes 32 to 42 and

Prices from **\$3.50 to \$6.00** Each

MISSIE'S DRESSES

In the above lot are also a line of Missie's Dresses for ages from 14 to 16 years.....**\$2.75**
